EDUCATION

Bachelor of Engineering in Computer Engineering

2022 – 2026

Modern Education Society's Wadia College of Engineering, Pune

CGPA: 8.07 / 10.0

Relevant Coursework: Data Structures & Algorithms (DSA), Object-Oriented Programming (OOP), Database Management Systems (DBMS), Computer Networks

SKILLS

Backend:	Python, Node.js, Express.js, REST APIs, OAuth, JWT
Frontend:	HTML, CSS, JavaScript, Tailwind CSS, React.js
Databases:	MySQL, PostgreSQL
AI & ML:	Scikit-learn, Keras, TensorFlow, LLMs Integration
Tools & Platforms:	Git, GitHub, Docker, Postman, Vercel, Render
Core Skills:	Analytical Thinking, Communication, Teamwork & Collaboration, Problem-solving, Adaptability & Flexibility

PROJECTS

Location-Based Meetup Platform

Feb 2026 – March 2026

- Built a real-time React & Express meetup platform with secure JWT authentication and OTP verification.
- Implemented geospatial search using PostgreSQL PostGIS with ST_DWithin and dynamic radius filtering.
- Developed an interactive Mapbox GL JS frontend with dynamic markers and reverse geocoding integration.
- Engineered plan creation, participant tracking, and role-based validation with secure backend logic.

Cloud Storage Web Application

Nov 2025 – Dec 2025

- Built Node.js cloud storage APIs and used PostgreSQL to manage user metadata and folder hierarchies.
- Implemented secure file uploads and downloads using MinIO object storage with time-limited signed URLs.
- Developed a responsive React frontend supporting file previews, starring, uploads, and fast navigation.
- Implemented secure public file sharing via token-based links without exposing direct storage objects.

Role-Based RAG Chatbot System

Oct 2025

- Built a role-based RAG chatbot using FastAPI and React to securely query organizational documents.
- Implemented Markdown document ingestion pipelines with targeted chunking and embedding generation.
- Designed a semantic retrieval layer using Chroma vector database with role-based metadata filtering.
- Integrated Groq LLaMA to generate grounded, context-aware answers utilizing direct source references.

TECHNICAL INVOLVEMENT

- Actively maintain a public GitHub portfolio featuring multiple full-stack web applications and continuous code contributions.
- Solved 120+ Data Structures and Algorithms problems across various competitive programming platforms to refine algorithmic thinking.
- Collaborated in university hackathons and technical events, building rapid prototypes and strengthening teamwork under tight deadlines.
